General Information

Journal references in Mathematical Reviews (MR) appear in the following form: *J. Utopian Math. Soc.* (6) **5(56)** (1988/89), *no.* 2, 18–53 (1990), where, after the abbreviated title, one has: (series number) volume number(volume number in first series, if given) (nominal date), issue number if given, first page–last page (imprint date). If only one date is given, it is the nominal date and follows the volume number. If no volume number is given, the year is used in its place. The symbol ★ precedes the title of a book or other nonperiodical that is being reviewed as a whole. If an issue of a journal is to be reviewed as a whole (e.g., when it is a collection of articles dedicated to an individual) and an ad hoc title is devised for this purpose then this title appears in braces { }. Articles that have been accepted for publication in certain important journals are now reviewed in MR from the final manuscript. The symbol ○ at the end of a review denotes such an item.

References to reviews in Mathematical Reviews before Volume 20 (1959) are by volume and page number (e.g., MR **15**, 122); from Volume 20 to Volume 58 (1979), by volume and review number (e.g., MR **20** #4185 or MR **23** #A513); from 1980 on, by issue and review number (e.g., MR 80a:46017). References to reviews in Jahrbuch über die Fortschritte der Mathematik and Zentralblatt für Mathematik are by volume and page number for the period before 1972 (e.g., Jbuch **50**, 173; Zbl **29**, 323) and by volume and review number since 1972 (e.g., Zbl 218:46017). Reviews reprinted from Applied Mechanics Reviews, Computing Reviews, Mathematics of Computation, Physics Abstracts, Referativnyĭ Zhurnal Matematika (Mekhanika, etc.), or Zentralblatt für Mathematik are identified by AMR, CR, MC, PA, RZhMat (RZhMekh, etc.), or Zbl, respectively, in parentheses following the reviewer's name.

Authors' names are given as listed in the item being reviewed. In order to identify each author uniquely, MR has assigned to certain authors' names an identifying form of the name. Superscript numbers are used in identifying forms where necessary. The identifying form is added in brackets following the published name.

Most review headings include institution codes. An institution code, indicating the author's address as listed in the reviewed item, consists of two [or three] parts separated by hyphens (e.g., 1-MR [or F-LYON-P]); these parts designate the country, the university or institution [and the department]. The absence of a department code usually indicates Department of Mathematics. Institution codes are also used to indicate the reviewer location for some reviewers. A list of codes appears in the most recent Annual Index of Mathematical Reviews.

Editorial Office: MR is a publication of the American Mathematical Society; it is edited at the University of Michigan in Ann Arbor. All editorial correspondence should be addressed to Mathematical Reviews, 416 Fourth Street, PO Box 8604, Ann Arbor, MI 48107-8604, USA; it may also be sent electronically via Internet to `MATHREV@MATH.AMS.COM` or by FAX to (313) 996-2916. All other correspondence should be addressed to the American Mathematical Society, PO Box 6248, Providence, RI 02940-6248, USA. Orders should be addressed to the American Mathematical Society, PO Box 1571, Annex Station, Providence, RI 02901-1571. *All orders must be accompanied by payment.*

Subscription information: Prices for MR for the year 1990, including the annual index, are $3791 list, $3033 institutional member, $465 individual member ($515 outside the US), $313 reviewer ($363 outside the US). Combination paper and microfiche subscriptions are $5042 list, $4034 institutional member. Nonindividual subscribers outside the United States and India must pay a postage surcharge of $60; nonindividual subscribers in India must pay a postal surcharge of $153. A late charge of $200 will be billed for orders received from nonmembers after January 1, 1990.

Back volumes information: Back issues are available for all volumes of MR; information concerning their prices can be obtained from the American Mathematical Society, PO Box 6248, Providence, RI 02940-6248. Back volumes are also available in microform from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106-1346.

Cumulative indexes: There are sets of cumulative author and subject indexes that cover the entire span of MR from 1940–1984.

There are several other services that are of interest to users of MR:

- Current Mathematical Publications (CMP) provides an early announcement of books, collections and research articles in the mathematical sciences, many of which will be reviewed in MR.
- MathSci is the electronic version of CMP and MR; it also contains additional listings of items in statistics and computer science. It is available online through several commercial vendors. MathSci tapes can also be leased by institutions for campus-wide use.
- MathSci Disc contains MR from 1985–1989 and approximately 70,000 items from CMP on a single compact disc (CD-ROM). It is ideal for conducting electronic searches of the literature.
- MathDoc is the document delivery service enabling researchers to obtain copies of most articles listed in CMP, MR or MathSci.

Further information about these services can be obtained by writing the Ann Arbor or Providence offices, or by consulting advertisements at the end of the monthly issues of MR.

Mathematical Reviews (USPS 333-940) is published monthly plus, in December, an annual author and subject index issue, by the American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213. Second-class postage paid at Providence, RI, and additional mailing offices. Postmaster: Send address changes to Mathematical Reviews, American Mathematical Society, PO Box 6248, Providence, RI 02940-6248.
